# NORTHERN IRELAND

Sail across the sea and you can enjoy glorious scenery and dramatic history, with a huge choice of attractions

Northern Ireland might not be at or near the top of your must-visit destinations list, but it certainly should be. The shortest crossing (with Stena Line) takes two hours and 15 minutes, from Cairnryan in Scotland to Belfast. Sailing from Liverpool will take you around eight hours.

Once there, you'll be hugely impressed by the fabulous destinations and attractions to choose from, both out in the wilds and in the towns and cities.

Northern Ireland boasts numerous unspoilt seaside resorts, world-famous natural phenomena and one of the UK's great new museums, but it's the warm welcome you'll experience from these superbly friendly folk that will make the biggest impression.

Beyond Belfast, the gorgeous countryside in this surprising province is just sensational, making it the perfect region to explore in a motorhome.

# ENJOY THE JOURNEY

Travel smarter and you'll all enjoy the trip! Here are our top tips for making the most of your drive

## Always make use of a pre-departure checklist

It pays to use a simple pre-departure checklist before you set off:

### INTERIOR

- Windows and rooflights locked
- Everything stowed securely
- Lockers/cupboards/drawers locked
- Hook-up lead stowed
- Gas turned off
- Fridge door locked, 12V selected
- Control panel checked

### EXTERIOR

- Walk around/look underneath
- Wind-out awning retracted
- Bikes secure on rack
- Exterior-access locker doors secure
- Elevating-roof lowered and secured (campervans only)

## Use the cruise control

If your 'van has cruise control, use it, because it is easy to increase your speed without realising.

When changing lanes, remember 'M-S-M-M'. Overtaking demands double-checking in the nearside mirror that your vehicle is well clear of what has been passed, before returning to the original lane.

## Watch out for the wind

Motorhomes can be susceptible to buffeting by winds on exposed stretches of motorway and when crossing long bridges. The 'Rule of Ten' applies here. If the motorhome is affected, gradually reduce your speed by 10 miles an hour. Still not happy? Slow down by another 10mph, and so on.

## Keep the kids entertained

If you're touring with children, journeys of 150–200 miles are long enough. Much more than that and nerves will begin to fray, and your first day or so away will be spent unwinding from the drive.

For longer journeys, it's worth splitting the driving in two, with an overnight stop at a campsite. Or get up early and beat the worst of the traffic while the children are snoozing in the back.

## Keep kids happy by breaking long trips

## Take your time on the road

Remember the most important fact, that you're on holiday! Why hurry? Give yourself plenty of time to complete your trip in as relaxed a way as possible, and allow for regular breaks every couple of hours, so that you stay alert on the road.

## Choose a good sat-nav

A quality sat-nav will make your journeys to campsites a much more straightforward and hence enjoyable part of the tour.

The best sat-navs come packed with useful features that will help to create a stress-free journey, allowing you to input the size and weight of your vehicle so you don't end up on unsuitable roads.

Modern sat-navs do more than get you from A to B, though, with handy functions ranging from built-in dash cams to regular weather updates, and helping you avoid traffic jams. A good sat-nav can make all the difference between a stress-free trip and a stressful one. ■
